BIKEPLAY GUARDIAN

Motorcycle system consisting of a touchscreen display and two front/rear cameras, for a safe and distraction-free driving experience.

Car Play and Video cameras.

BIKEPLAY GUARDIAN

BikePlay Guardian is the 5-inch waterproof capacitive touchscreen display (can also be used with gloves) with a "mirroring" function that duplicates the smartphone screen (iOS or Android) to reduce distractions while riding the motorbike. Thanks to compatibility with voice commands, easily access all the features you need without taking your eyes off the road (Google Assistant).

BikePlay Guardian is also equipped with a double front and rear camera with QFHD resolution which ensures constant monitoring of the surrounding environment, even in conditions of poor visibility.

KEY POINTS

SAFETY ON THE ROAD

thanks to the dual camera with continuous recording and complete front and rear view of the motorbike.

EASE OF USE

the intuitive and simplified interface of the main features.

SIMPLIFIED NAVIGATION

use your navigation app to get real-time driving directions.

INTEGRATION WITH SIRI/GOOGLE

Execute voice commands to make calls, send messages, adjust music without having to physically touch the screen.

Code: C1636, EAN CODE: 8011869207167

BIKEPLAY GUARDIAN

TECHNICAL FEATURES

- 5" touchscreen display
- Waterproof
- Linux system
- Carplay (iOS) and Android Car (Android)
- Capacitive touchscreen
- Built-in Bluetooth
- Wi-Fi with dedicated app on smartphone for camera settings
- QFHD dual camera (3840 x 2160 pixels)
- GPS to record the position and speed of the motorbike
- Impact sensor, in the event of an accident, the event is protected from overwriting
- Anti-vibration algorithm
- Anti-glare screen
- Night vision
- TPMS, tire pressure sensors that constantly monitor tire pressure and temperature

Code: C1636

COMPLIANCE

Device in compliance with the RE-D 2014/53/EU regulation

Why is BikePlay Guardian useful?

Safer Navigation: Use your smartphone's navigation apps by viewing directions directly on the touchscreen without having to look at your phone while driving.

Integration with Siri/Google: by interfacing with Siri and Google on your smartphone, it performs voice commands to make calls, send messages, adjust the music without having to physically touch the screen.

Access to multimedia content: you can listen to your favourite music, podcasts and radio apps directly through the main unit. You can use apps like Apple Music, Spotify, and more.

Tire Pressure Monitoring System: tire pressure sensors that constantly monitor tire pressure and the temperature. If the pressure drops below a preset level, the system warns the driver with a warning on the screen.

Waterproof: guarantees high water protection and is not afraid of mud and bad weather.

BikePlay Guardian offers an advanced level of safety with dual front and rear cameras, allowing for continuous monitoring and recording (on a micro SD card, not included) what is happening around the motorbike, both frontally and on the back, managing its functions directly from the dedicated app. Thanks to the **built-in GPS**, it saves speed and position when recording your videos.

The **QFHD resolution** ensures clear recordings even in low light conditions. Furthermore, the **anti-vibration algorithm** makes images more stable. Thanks to the **impact sensor**, in the event of an accident, the event is protected from overwriting.

BikePlay Guardian is designed for perfect integration with all intercoms, in particular with the Midland family.

Car Play and Video cameras.

BIKEPLAY GUARDIAN

BikePlay Guardian is the ideal infotainment system for the motorcyclist while driving, with an eye on his safety and that of those around him.
