

ALBRECHT BPA 600

The new Albrecht BPA 600 is the perfect companion for every motorcycle tour. The headset connects wirelessly to navigation systems, smartphones, tablets and other devices and can establish two connections simultaneously. This means you can listen to music and receive the navigation system's announcements or take a call at the same time. Headphones and microphone are attached to the helmet with Velcro and connected via the waterproof plug. Then simply attach the transmitter unit to the helmet using the adhesive or clamp mount - and off you go! The BPA 600 can be ideally combined with the Midland BTTalk Button and the free BTTalk app. You can even connect PMR446 radios with the optional connection cable.
