STREET GUARDIAN MINI

The ultra-compact camera that always protects you.
Invisible, Lightweight and Reliable in every situation.

Dash Cam

STREET GUARDIAN MINI

Small, lightweight and easy to install, Street Guardian Mini accompanies you on all your travels. With dimensions of just 34x59x34 mm and a weight of just 61 g, it is practically invisible, perfect for any vehicle. **It records video and audio automatically in a loop**, acting as a reliable witness in case of need, such as accidents or road disputes...

The built-in **sensor G** also detects impacts and saves critical videos, protecting them from accidental overwriting. Ideal for those seeking **security and discretion**, the Street Guardian Mini is simple to use and ready for any eventuality. Whether you are travelling or parked, you can count on it to have everything under control.

Key Points

- Built-in GPS
- Wi-Fi for easy smartphone connection via the Dashcam Player app,
- Ultra-compact dimensions (see packaging): 34x59x34 mm.
- Flexible power supply: possibility of connection via USB-C and USB-A.

STREET GUARDIAN MINI

Description

With very small dimensions of just 34x59x34 mm and a weight of just 61 g, Street Guardian Mini represents the perfect balance between **discretion and functionality**. It integrates easily into any vehicle, taking up minimal space and being practically invisible. It is ideal for those looking for an **elegant and non-invasive solution for safety on the road and in parking lots**.

Thanks to the **Built-in GPS**, it offers precise tracking of your movements, recording position and speed in real time. The Wi-Fi connection, compatible with the dedicated **Dashcam Player app**, allows easy access to recorded videos directly from your smartphone. You can view, save or share files in a few seconds, without having to remove the memory card or connect cables.

Loop recording ensures that the memory never runs out, automatically deleting the oldest files to make room for new ones. However, **thanks to the built-in sensor G**, videos relevant to impacts or accidents are automatically protected from overwriting, giving you extra security in every situation.

With **the parking cable option**, available separately, the dashcam remains active even when the engine is off, monitoring your vehicle in unattended areas. This makes it particularly useful for those who own **campers, vans or cars** that are often left in isolated parking lots.

The power supply is extremely flexible, with support for USB-C and USB-A sockets, easily adapting to different types of vehicles. In short, perfect for protecting your vehicle at all times.

Code: C1645
Compliance: EC regulations
EAN CODE:
